

INFLAMMATION CONTROL WITH LOW LEVEL LASER

Low Level Laser Therapy (LLLT) uses infrared laser light and when used in conjunction with homeopathic medicines such as Argentyn 23 and Inflamyar, helps to decrease pain, helps tissues heal, helps clear up infections and inflammation. It is a very effective holistic approach in managing sensitive teeth, helping extractions heal, relaxing sore jaw muscles and jaw joints.

Low level laser therapy is safe, painless, and non-invasive and the results are often immediate and sustainable. How does it work? All light has an effect on the cells of the human body. What that effect is shall be determined by the wavelengths of light applied. The low level laser produces a beam of light that has a specific wavelength and frequency. When the light of the laser is applied around the tissue, the electromagnetic energy is converted to chemical energy within each cell which sets in motion a chain of chemical reactions allowing the healing process to begin.

LLLT works at the cellular level to stimulate the production of cellular energy in the form of adenosine triphosphate, or ATP. ATP can be thought of as the gasoline of the cell – it provides the energy needed to help a cell function effectively and repair itself.

LLLT is also used in our smoking cessation program. Ask us for more information. We are happy to provide these holistic, conservative and effective therapies for you.

Use the smaller curved tip for individual tooth issues, fever blisters and cold sores. Move the lip aside and point it at the tooth/gum/bone for 2 minutes 2Xday. Use the straight one with the broader beam for jaw joint and jaw muscle issues. Point it at the affected area for 5 minutes 2x day.

2023 Newest Model Red Light Therapy Device Enhanced Strong Energy Red Infrared Light Wand for Body Pain Relief and Healing 940nm 850nm 830nm 660nm

【Who Needs Red Light Therapy】 Anyone who suffers from oral nose ear, various body pain and inflammation. Anyone who needs to relieve muscle stiffness and a faster healing after injured. Red and infrared light is highly effective in healing the skin, it can help you recover faster by reducing inflammation and easing pain while promoting faster healing.

💡 【2-In-1 Facial & Body】 Our red light therapy device comes with a detachable tip. It is a facial therapy device and targeted at mouth, nose and ear with tip on. Great for cold sore, canker sore, fever blister treatment for lips. Remove the tip, it can be a pain relief device and healing device for neck, shoulder, wrist, finger, waist, knee, ankle, joints etc.

💡 【Enhanced Wavelengths】 It is proved that wavelengths of red and infrared light is beneficial for body. upgraded red light therapy device with its 5 LED lights and 5 wavelengths 940nm-660nm-850nm-810nm-660nm. It's absorbed by the body and help to healing, pain relief, blood circulation, muscles recovery Please be aware that 850nm and 900nm are not visible to bare eyes and when they are turned on. If you look it closely from the side, you will see the light is slightly red

💡 【Exclusive Pulse Mode】 Special design for thin skin to give skin a transitory buffer. It works by pulsed irradiation way to reduce tissue heating to avoid overheating. If you feel the energy is too hot, the pulsed mode would be a considerate choice. Simply hold the light over the painful area for up to 3 mins daily, 1-3 times a day. Safe easy touse.

💡 【User Friendly Design】 handheld infrared light therapy device upgrated with 5 mins timer. One button operation is friendly for people of all ages. Wireless design provides portable and lightweight features. It comes with two rechargeable batteries and a charger which are ideal for traveling.
