Health and Wellness

May is National Stroke Awareness Month: On average, someone in the U.S. has a [stroke](#) every 40 seconds, and every 4 minutes someone dies from one, according to the [National Institutes of Health](#). Stroke is one of the leading causes of death in the U.S. and causes more long-term disabilities than any other disease. The older you are, the more likely you are to have a stroke, as the risk of having a stroke more than doubles each decade after age 55.

Medication Reminders from the Wellness Ministry: Are you taking medications as prescribed?

Taking medications correctly is generally defined as the extent to which patients take medication as prescribed by their doctors. This involves factors such as getting prescriptions filled, remembering to take medication on time, and understanding the directions. *Therefore, if you take medications that require food, please take the time to eat.*

Congratulations

Congratulations to all members celebrating wedding anniversaries in the month of May.
