Health and Wellness

Save Your Vision Month (March) aims to increase awareness about good eye care and encourages people to get regular eye exams. With computers becoming an everyday part of people’s lives, the risk of eye strain and damage is higher than ever.

African American eye health at a glance

- More than 825,000 African Americans have diabetic retinopathy
- African Americans are at higher risk for glaucoma at a much younger age than other populations
- Nearly 190,000 African Americans have low vision

Medication Reminders from the Wellness Ministry: Are you taking medications as prescribed?

Taking medications correctly is generally defined as the extent to which patients take medication as prescribed by their doctors. This involves factors such as getting prescriptions filled, remembering to take medication on time, and understanding the directions. *Therefore, if you take medications that require food, please take the time to eat.*

Congratulations

Congratulations to all members celebrating wedding anniversaries in the month of March.
